Which algorithms for authentication and privacy at HTTPS are supported by classic switches?

- 2018-02-09 - Classic Switches

The classic switches with release 9.0.0 support for HTTPS access following combinations:

prio ciphersuite protocols
1 AES128-SHA TLSv1
2 RC4-SHA TLSv1

3 RC4-MD5 TLSv1

The most secure combination is used depending on the accessing browser.
