

Why do not all devices list the touch current (leakage current)?

- 2024-09-19 - Products

Touch current (a bit different than "leakage current") appears with AC devices. DC devices, especially low voltage DC (SELV) devices, are not affected and thus this parameter is not tested.

AC devices are tested according to EN 61131-2:2007 and EN 60950-1:2006...+A2:2013, UL 60950-1 2nd edition.
