IHV Audit Trail - Linux

- 2018-02-21 - Industrial HiVision

As of v6.0 IHV logs events to the Linux SysLog.
The events include:

- Log in and out of Industrial HiVision
- Any action which results in an SNMP Set Request being sent to a device, including the MIB variable that was set, and the new value
- Any actions from HiDiscovery within Industrial HiVision
- Start of external applications
- All actions for which the "Edit Mode" is needed

Edit syslog.conf

In this example it is rsyslog.conf file present in /etc/ folder

Edit/uncomment the following lines:

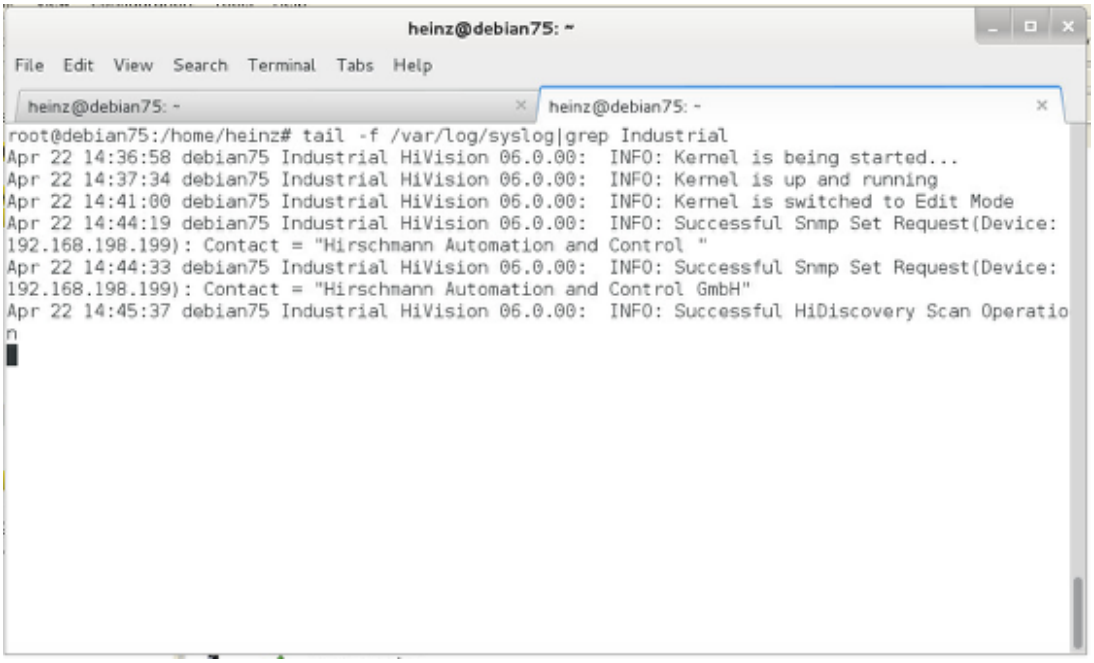

1. provides UDP syslog reception

   $ModLoad imudp

   $UDPServerRun 514

Restart rsyslogd in order to apply the changes

SysLog File

tail -f /var/log/syslog |grep Industrial
