

What is the characteristic of the 16 node free of charge license of Industrial HiVision

- 2018-02-09 - Industrial HiVision

The free of charge IHV license has the follow characteristic:

- It can manage a maximum of 16 nodes.
- It supports all functions offered by the paid version, except sub-domains.
- Only one free of charge license can be used per installation.
- The license cannot be combined with other licenses.
So if an Industrial HiVision installation has a 16 node free of charge license, and a 32 node paid license, the system will support 32 nodes.
- The license never expires.
- Industrial HiVision v06.0.04 or more recent is required.
