

Security Vulnerability - Sicherheitslücke - Hirschmanns Reaktion

Christoph Wrobel - 2021-06-08 - Products

Hirschmann discloses information about fixed security vulnerabilities as part of our issue lists with every update. Additionally, for security issues with *high* or *critical* severity, we publish bulletins with either a workaround or instructions for a fix on www.belden.com/security.

Note that we cannot provide any additional information, especially not whether a particular vulnerability affects our devices. An attacker could use this information for a targeted attack of a vulnerability while we are still in the process of developing and testing a fix. This would put all our customers at risk.

We recommend that you use the latest available software version and check the issue list as well as our Security website for additional information.
