

Why does HiMobile request information about bluetooth devices during installation?

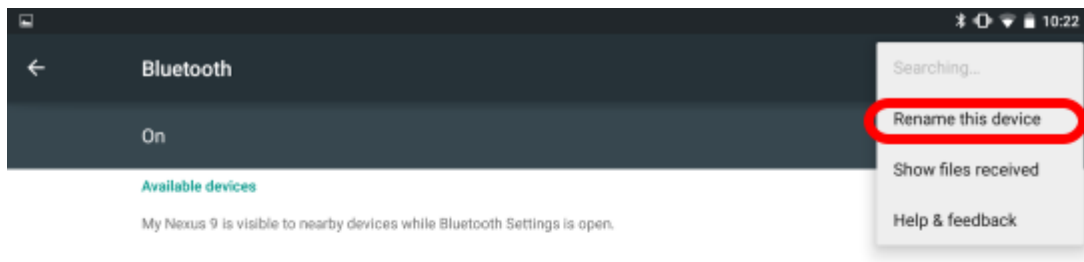

- 2018-02-21 - HiMobile

For Android devices HiMobile uses the device name as configured in the bluetooth settings to register in Industrial HiVision.

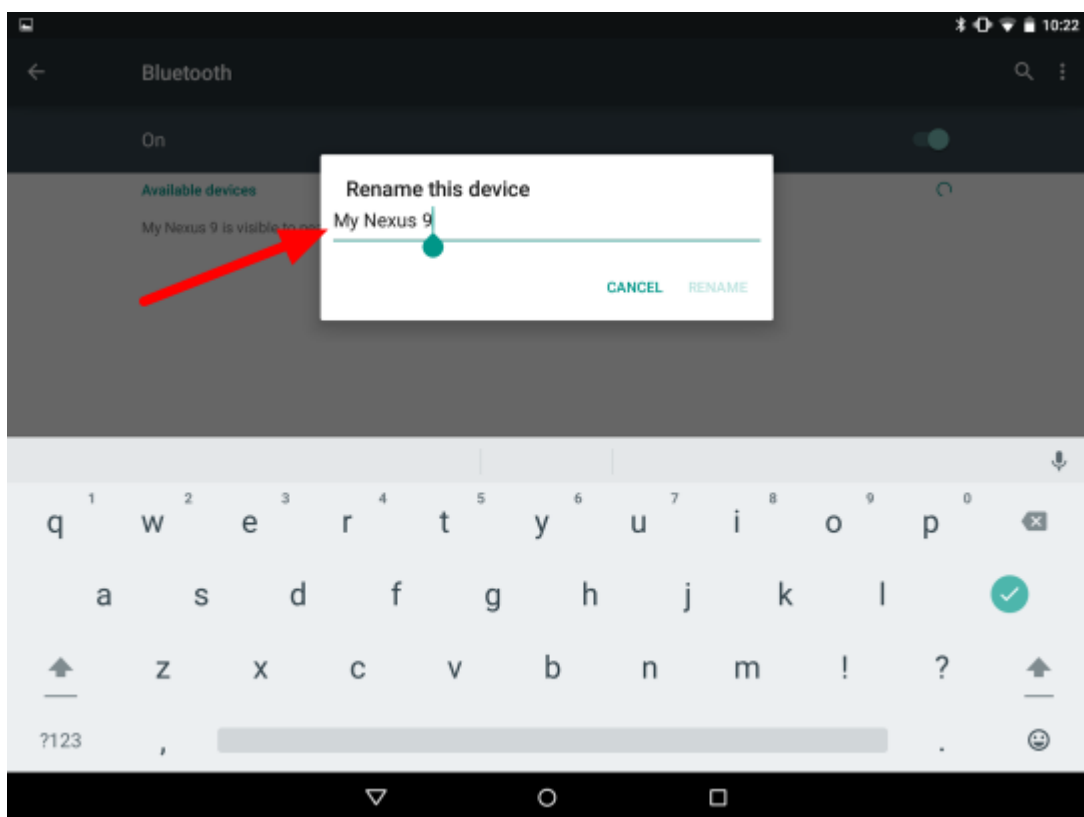

Before installation of HiMobile the user needs to confirm the following message.

Example

To change the device name navigate to the bluetooth settings and select 'Rename this device'

The specified device name in the bluetooth settings is the device name HiMobile registers the mobile device in Industrial HiVision.

The screenshot shows the 'Mobile Devices' section of the 'Preferences' window. A table lists mobile devices with columns: Push Notifications, Device Name, Device Model, Protocol, Registered ID, and Device UUID. The first row is highlighted, showing 'Active' for Push Notifications, 'My Nexus 9' for Device Name (circled in red), 'Nexus 9' for Device Model, 'Google' for Protocol, and a long alphanumeric string for Registered ID. The Device UUID is also visible. On the right, there is a 'Delete' button. At the bottom of the window are 'OK', 'Apply', 'Cancel', and 'Help' buttons.

Push Notifications	Device Name	Device Model	Protocol	Registered ID	Device UUID
Active	My Nexus 9	Nexus 9	Google	AFW5B56496363C7F5641E37646494476464...	13C44F6126C364E...

The list of all registered mobile devices can be seen in the preferences menu.
