Security Vulnerability Corrected in version 04.1.01

Vulnerability Description Vulnerability in the Java SE, Java SE Embedded product of Oracle lava CVE-2020-2583 Java SE (component: Serialization). Supported that are affected are Java SE and Java SE Embedded. Difficult to exploit vulnerability allows unauthenticated attacker with network access via multiple protocols to compromise Java SE, Java SE Embedded. Successful attacks of this vulnerability can result in unauthorized ability to cause a partial denial of (partial DOS) of Java SE, Java SE Embedded. service Vulnerability in the Java SE, Java SE Embedded product of Oracle Java Java SE (component: Security). Supported CVE-2020-2590 are affected are Java SE and Java SE Embedded. Difficult to exploit vulnerability allows unauthenticated attacker with network access via Kerberos to compromise Java SE, Java SE Embedded. Successful attacks of this vulnerability can result in unauthorized update, insert or delete access to some of lava SE Embedded accessible data. lava SE, Vulnerability in the Java SE, Java SE Embedded product of Oracle Java Java SE (component: Networking). Supported CVE-2020-2593 that are affected are Java SE and Java SE Embedded. Difficult to exploit vulnerability allows unauthenticated attacker with network access via multiple protocols to compromise Java SE, Java Successful attacks of this vulnerability SE Embedded. can result in unauthorized update, insert or delete access to some Java SE, Java SE Embedded accessible data as well as unauthorized read access to a subset of Java SE, Java SE Embedded accessible data. Java Vulnerability in the Java SE, Java SE Embedded product of Oracle CVE-2020-2654 Java SE (component: Libraries). Supported versions that are affected is Java SE. Difficult to exploit vulnerability allows unauthenticated attacker with network access via multiple protocols to compromise Java SE. Successful attacks of this vulnerability can result in unauthorized ability to cause a partial denial of service (partial DOS) of Java SE.

Java CVE-2020-2659 Vulnerability in the Java SE, Java SE Embedded product of Oracle Java SE (component: Networking). Supported versions that are affected are Java SE and Java SE Embedded. Difficult to exploit vulnerability allows unauthenticated attacker with network access via multiple protocols to compromise Java SE, Java SE Embedded. Successful attacks of this vulnerability can result in unauthorized ability to cause a partial denial of service (partial DOS) of Java SE, Java SE Embedded.

Java CVE-2020-2601 Vulnerability in the Java SE, Java SE Embedded product of Oracle Java SE (component: Security). Supported versions that are affected are Java SE and Java SE Embedded. Difficult to exploit vulnerability allows unauthenticated attacker with network access via Kerberos to compromise Java SE, Java SE Embedded. While the vulnerability is in Java SE, Java SE Embedded, attacks may significantly impact additional products.

Successful attacks of this vulnerability can result in unauthorized access to critical data or complete access to all Java SE, Java SE Embedded accessible data.

Java CVE-2020-2604 Vulnerability in the Java SE, Java SE Embedded product of Oracle Java SE (component: Serialization). Supported versions that are affected are Java SE and Java SE Embedded. Difficult to exploit vulnerability allows unauthenticated attacker with network access via multiple protocols to compromise Java SE, Java SE Embedded. Successful attacks of this vulnerability can result in takeover of Java SE, Java SE Embedded.

New features in version 04.1.01

 Port Generation, You can now use port mapping to control how the ports are displayed in Industrial HiVision.

Issues fixed in version 04.1.01

 You can find the problems, workarounds and fixes related to this release in the issue list
