

How to add an Industrial HiVision license

- 2022-01-10 - Industrial HiVision

This howto describes the procedure to add a license in Industrial HiVision (IHV).

Prerequisites: Installed Industrial HiVision, eMail with IHV license code

Open IHV Preferences

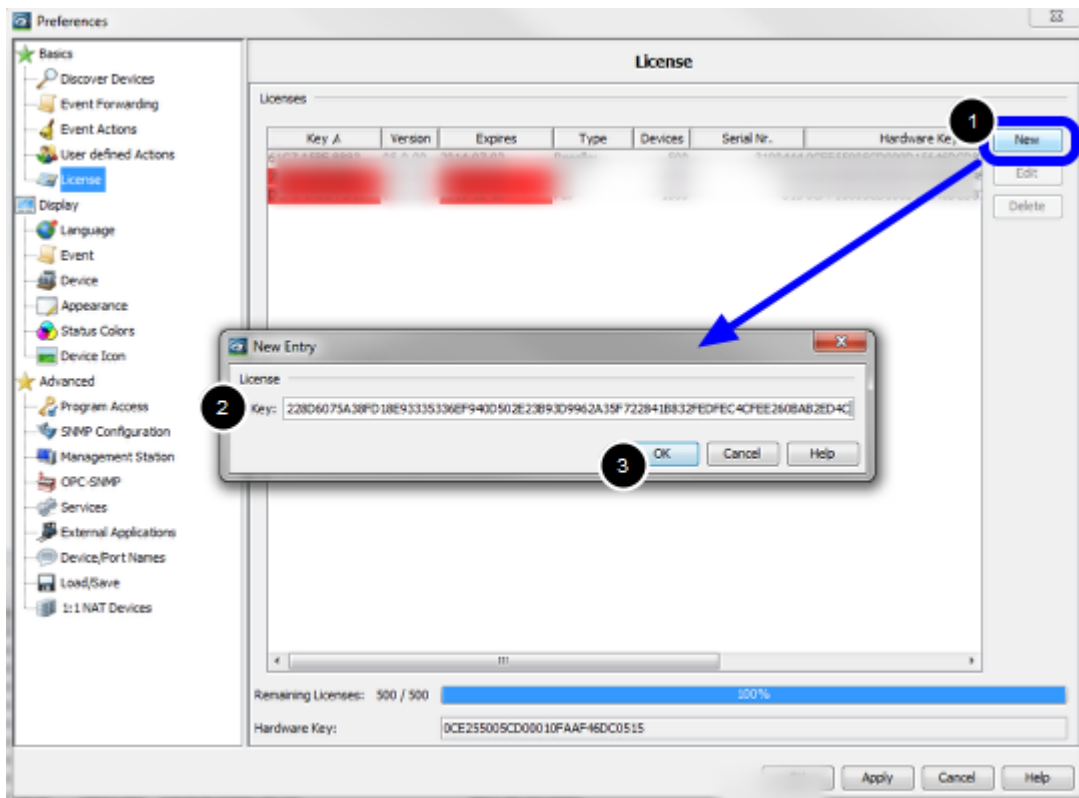

Start Industrial HiVision and open the '**Prefrences**' dialog (Configuration - Preferences)

eMail including License Key

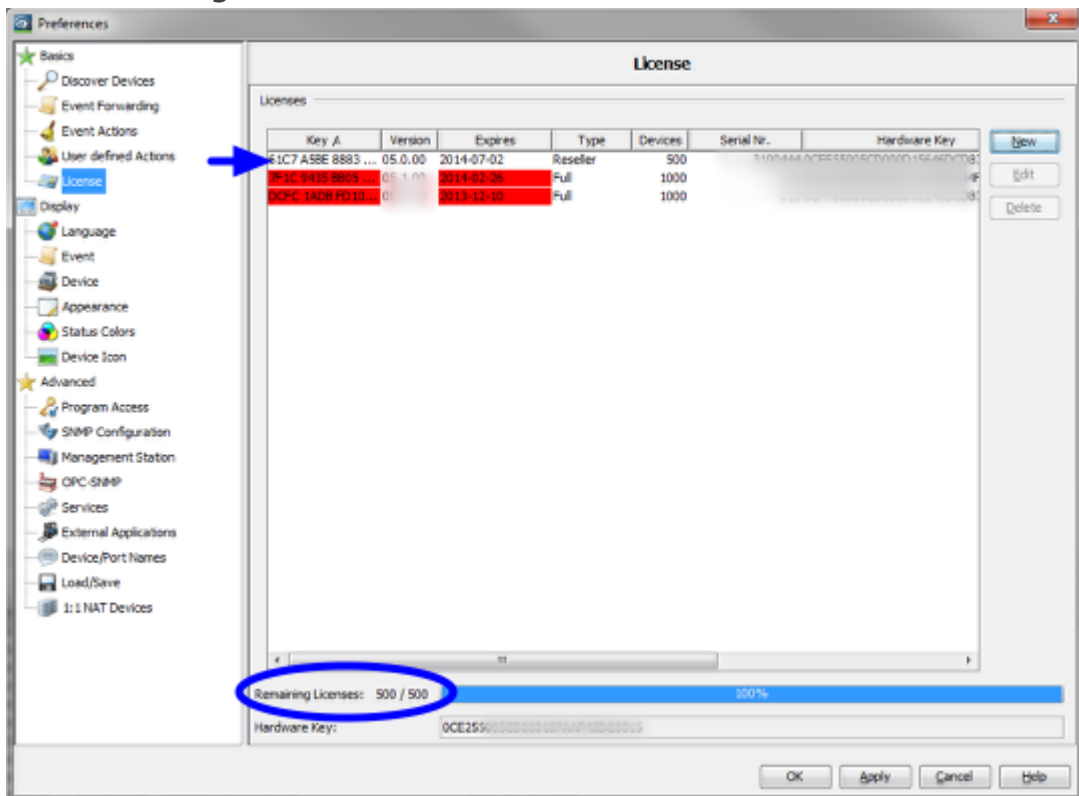

Copy the license code from the received eMail.

License Dialog - New Entry

1. Click '**New**' to add an entry
2. Paste the license key from the received license eMail
3. Close the pop-up window with '**Ok**'

License Dialog - check for valid license

Valid licenses are shown without background color, red entries are expired.
Below you can see the total number and remaining licenses.

Event log message

The screenshot shows a window titled "Unacknowledged Events" with a table of event logs. The table has columns for ID, Ack., Type, Category, Time, User, Source, Component, and Message. Three events are listed, all with the "Ack." checkbox unchecked. The first event (ID 66) is a "User Intervention" at 2014-03-17 16:03:55, where "Preferences Modified by User". The second event (ID 68) is a "License" at 2014-03-17 16:03:55, where "Industrial HVision is licensed". The third event (ID 67) is a "License" at 2014-03-17 16:03:55, where "Number of Licenses: 3300".

ID	Ack.	Type	Category	Time	User	Source	Component	Message
66	<input type="checkbox"/>	User Intervention		2014-03-17 16:03:55		Industrial HVision		Preferences Modified by User
68	<input type="checkbox"/>	License		2014-03-17 16:03:55		Industrial HVision Service		Industrial HVision is licensed
67	<input type="checkbox"/>	License		2014-03-17 16:03:55		Industrial HVision Service		Number of Licenses: 3300

After closing the preferences dialog you can see an event log with the new number of licenses.
