

I receive an error message if trying to set a trap destination

Christoph Strauss - 2023-02-02 - Gecko

If you try to set a trap destination in your GECKO you might get an error message "invalid IP address".

This usually happens if you have updated your GECKO from firmware versions <02.3.x. The reason for this are the pre-populated fields with 0.0.0.0. The default values have been changed and as of 02.3.x the trap receiver IP address is empty by default. As a workaround you can delete all entries with 0.0.0.0 and then set your intended trap receiver IP.

If you start from factory defaults in v02.3.x this does not show up.

The screenshot shows the 'Alarms (Traps)' configuration page in the Hirschmann web interface. The 'Destination Addresses' table is as follows:

	IP Address	Trap Community
1. Address	172.16.20.143	public
2. Address	0.0.0.0	public
3. Address	0.0.0.0	public
4. Address	0.0.0.0	public
5. Address	0.0.0.0	public
6. Address	0.0.0.0	public
7. Address	0.0.0.0	public
8. Address	0.0.0.0	public

An error dialog box is shown with the message: **Error**
Invalid IP Address
OK
