

Webinterface Auto-Login

Christoph Strauss - 2019-01-25 - Industrial HiVision

With Industrial HiVision 8.0 the webinterface auto-login feature for HiOS devices was introduced.

If launching the web interface of an HiOS device from Industrial HiVision, stored credentials will be used to perform an auto-login.

This feature requires HiOS firmware version 07.0.06, 07.5.00 or higher.
