Provize v01.0.02 was released

2020-12-14 - - Software Products

Issues fixed in version 01.0.02

- You can find the problems, workarounds and fixes related to this release in the issue list.

Version 01.0.00

Welcome to the free of charge first version of Provize. Version 1.0 has limited functionality and was created to validate the underlying architecture and the user interface.

Like all new software, Provize contains known issues, limitations, and opportunities for improvement. To help us enhance Provize both for you and other potential customers, we would appreciate your feedback. If you discover an issue, or think of an improvement, please open a ticket in our help desk. This will ensure that your contribution is permanently registered.

Known issues are listed in the issue list which is delivered with the software.

Provize is currently in an accelerated development phase. We will issue updates frequently. To be notified when a new update is available, please subscribe to the Provize mailing list.
