Are Schneider branded Hirschmann products affected by security breach CVE-2014-6271, also called ""shellshock""?

- 2024-09-19 - Products

Schneider branded Hirschmann products are **not affected** by the BASH security breach CVE-2014-6271 (nor by CVE-2014-7169), also known as "Shellshock", because they either don't use the BASH shell or they do not contain a shell at all.
