User Management

This lesson explains how to setup the user management of Industrial HiVision as of v6.0

Access Roles

Preferences		
Basics	User Management	
Discover Devices Loc Management Event Forwarding Event Forwarding Event Actions Display Longuage Display Event Device Device Device Device Icon Advanced Program Access Device Icon Management Station Device Port Names Device/Port Names Device/Port Names Load/Save Display Mobile Devices	Access Roles Role Name A. Login Edit Made User Manag Web Access Role Name : admin Persissions: V Login Veb Access Veb Ac	Edit Delete
	OK Apply Cancel] Help

Create two access roles

- admin with permission Login, Edit Mode, User Management, Web Access
- user with permission Login, Webaccess

Create local superuser

2 Preferences							
Basics	User Management						
Access Roles					- 1		
Role Na	me A Login	Edit Mode User Manag W	leb Access	New			
event Actions admin	1	2 2	V		31		
- User defined Actions User	1	8 8	V	Edit			
		Local Users Configuratio	on		83		
Display					,		
			Balan adata				
		chris LD4	Policy admin	USE/	New		
- 🗸 Device		hannes1 RA	DIUS 🔽	1	Edit		
- Appearance		ihiviadmin RA	DIUS V	Image: A state of the state	Delete		
- 😵 Status Colors		inviuser RA	DIUS 📋		Boon		
		New Entry		1			
* Advanced Local Liser		User					
- 2 Program Access		The Name of Street					
- UDAP Serve	r: Edit	User Name: superuser					
Management Station		Password: •••••	••				
- CPC-SMP	er Bent	Arress Roles: 12 admin

- Device Port Names							
- load/Save				Cancel			
11 1-1 NAT Devices							
Muhia Denises		_					
· · · · · · · · · · · · · · · · · · ·		-			_		
				ox	Gencel		

Create a local superuser with access role **admin**. This insures access even if the authentication server is not available.

Important is to give the admin group permission to the user management.

Radius-Server configuration

Freeradius Configuration Example

Dictionary

Add the following lines to /etc/freeradius/dictionary

VENDOR Hirschmann 248 BEGIN-VENDOR Hirschmann ATTRIBUTE Hirschmann-Access-Rights 1 string ATTRIBUTE Hirschmann-Function-Rights 12 integer END-VENDOR Hirschmann

users

Add users to /etc/freeradius/users

Example: *admin Cleartext-Password* := "testtest" *User-name* == "*admin*", *Hirschmann-Access-Rights* := "*admin*"

Policy order							
2 Preferences							
Basics				User Manag	ement		
Discover Devices User Management Event Forwarding Event Actions User defined Actions User defined Actions Userse Display Usense Display Event Device Appearance Status Colors Device Icon Advanced Program Access Polyce Credentials	Access Roles Role Nome A admin user Policies Local Users: Edit LDAP Server: Edit	Login ⊉ ⊉	Edt Mode	User Manag	Web Access		New Edit Delete
Management Station	RADIUS Server: Edit]					
CrCLSNer Services External Applications Device/Port Names Load/Save 1:1 NAT Devices Mobile Devices	Selectable Policies				Selected Order		
					0	K Apply	Cancel Help

First pick your choice from the selectable policies and move them with the arrows to the Selected Order.

Change the order by highlighting one entry and move up or down using the arrow buttons. Make sure that local authentication comes first

Test before activate

Before activating the User Management the pop-up window offers the possibility to test your current user configuration.

Login Window

After activating the User Managment you need to login each time you start IHV.
