## What is the last L3E firmware version supported by PowerMICE 4128-5 hardware?

- 2018-02-09 - Classic Switches

The last L3E firmware version supported by MS4128-5 hardware is v05.0.11

 [Web\\_pmL3E\\_05011](#)

Extract of v06.0.00 PowerMICE readme:

Attention: The PowerMICE L3E (pmL3E) 06.0.00 software does not support the old MS4128-5 hardware anymore. This results from the low total memory of this device. If the software detects this constellation (pmL3E-06.0.00 with MS4128-5) an event log entry is made (S\_watson\_UNSUPPORTED\_HARDWARE).
