Version 01.5.00

New features in Provize® Suite

You can find the following new features in this version.

- Explorer - Commission ProSoft devices. Provize® Explorer now scans and discovers ProSoft devices.
- Suite - Automatic update. The automatic update function helps you check for software updates.
- Explorer - Save configuration. The save configuration function lets you save the changes you made for HiOS and HiEOS devices displayed in the discovered devices list.
- Explorer - Ping devices. The ping function lets you troubleshoot the accessibility of devices displayed in the discovered devices list.
- Explorer - Reload single device. The reload single device button lets you reload individual devices displayed in discovered devices list.
- Suite - Send feedback through an email client. The feedback function lets you send your comments to Belden through email.
- Explorer - MultiConfig initial password change. The initial password button lets you change the default password for multiple devices during the initial configuration of the devices.
- Planner - Port planning. The port planning function lets the user assign port numbers at both ends of a link.
