How to set up 802.1x with EAP-TLS between Open BAT (as AP and Radius server) and Windows 7 client

- 2023-11-17 - BAT, WLC (HiLCOS)

This lesson describes how an OpenBAT can be configured as AP using its own radius server and providing an EAP-TLS connection for a Windows 7 client and how to create certificates for this use with XCA.

×

This is the network which will be configured in this Howto.

This configuration and this topology is an example only. It can be modified according to customers needs.-

Configure OpenBAT
