Industrial HiVision 08.1.01 was released

2020-04-03 - - Software Products

Security Vulnerability Corrected in version 08.1.01

Vulnerability	Description
Java CVE-2020-2583	Vulnerability in the Java SE, Java SE Embedded product of Oracle Java SE (component: Serialization). Supported versions that are affected are Java SE and Java SE Embedded. Difficult to exploit vulnerability allows unauthenticated attacker with network access via multiple protocols to compromise Java SE, Java SE Embedded. Successful attacks of this vulnerability can result in unauthorized ability to cause a partial denial of service (partial DOS) of Java SE, Java SE Embedded.
Java CVE-2020-2590	Vulnerability in the Java SE, Java SE Embedded product of Oracle Java SE (component: Security). Supported versions that are affected are Java SE and Java SE Embedded. Difficult to exploit vulnerability allows unauthenticated attacker with network access via Kerberos to compromise Java SE, Java SE Embedded. Successful attacks of this vulnerability can result in unauthorized update, insert or delete access to some of Java SE, Java SE Embedded accessible data.
Java CVE-2020-2593	Vulnerability in the Java SE, Java SE Embedded product of Oracle Java SE (component: Networking). Supported versions that are affected are Java SE and Java SE Embedded. Difficult to exploit vulnerability allows unauthenticated attacker with network access via multiple protocols to compromise Java SE, Java SE Embedded. Successful attacks of this vulnerability can result in unauthorized update, insert or delete access to some of Java SE, Java SE Embedded accessible data as well as unauthorized read access to a subset of Java SE, Java SE Embedded accessible data.

Java CVE-2020-2601	Vulnerability in the Java SE, Java SE Embedded product Java SE (component: Security). Supported vers are affected are Java SE and Java SE Embedded. Difficult vulnerability allows unauthenticated attacker network access via Kerberos to compromise Java SE, Java Embedded. While the vulnerability is in Java S Embedded, attacks may significantly impact additional p Successful attacks of this vulnerability can result unauthorized access to critical data or complete access all Java SE, Java SE Embedded accessible data.	sions that t to exploit with va SE E, Java SE products.
Java CVE-2020-2604	Vulnerability in the Java SE, Java SE Embedded product Java SE (component: Serialization). Supported that are affected are Java SE and Java SE Embedded. Dif exploit vulnerability allows unauthenticated at network access via multiple protocols to compromise Jav SE Embedded. Successful attacks of this vulner result in takeover of Java SE, Java SE Embedded.	versions fficult to ttacker with va SE, Java
Java CVE-2020-2654	Vulnerability in the Java SE, Java SE Embedded product of Oracle Java SE (component: Libraries). Supported versions that are affected is Java SE. Difficult to exploit vulnerability allows unauthenticated attacker with network access via multiple protocols to compromise Java SE. Successful attacks of th vulnerability can result in unauthorized ability to cause a partial denial of service (partial DOS) of Java SE.	
Java CVE-2020-2659	Vulnerability in the Java SE, Java SE Embedded product Java SE (component: Networking). Supported that are affected are Java SE and Java SE Embedded. Dif exploit vulnerability allows unauthenticated with network access via multiple protocols to compromis Java SE Embedded. Successful attacks of this can result in unauthorized ability to cause a partial denia (partial DOS) of Java SE, Java SE Embedded.	versions fficult to attacker se Java SE, vulnerability
Java CVE-2020-8840	FasterXML jackson-databind 2.0.0 through 2.9.10.2 lacks xbean-reflect/JNDI blocking, as demonstrated org.apache.xbean.propertyeditor.JndiConverter.	s certain by
Java CVE-2020-9546	FasterXML jackson-databind 2.x before 2.9.10.4 mishand interaction between serialization gadgets and related to org.apache.hadoop.shaded.com.zaxxer.hikari.HikariCom shaded hikari-config).	typing,
Java CVE-2020-9547	FasterXML jackson-databind 2.x before 2.9.10.4 mishand interaction between serialization gadgets and related to com.ibatis.sqlmap.engine.transaction.jta.JtaTransaction ibatis-sqlmap).	typing,
Java CVE-2020-9548	FasterXML jackson-databind 2.x before 2.9.10.4 mishand interaction between serialization gadgets and related to br.com.anteros.dbcp.AnterosDBCPConfig (aka core).	typing,

Java FasterXML jackson-databind 2.x before 2.9.10.2 lacks certain net.sf.ehcache blocking.

New features in version 08.1.01

• Port Generation, When you create a new PSM, you can now use port mapping to control how the ports are displayed in Industrial HiVision.

Issues fixed in version 08.1.01

• You can find the problems, workarounds and fixes related to this release in the issue list
