How can I start HiView as external application?

- 2018-02-21 - Industrial HiVision

Starting HiView using the AppletLauncher.exe with the option -address allows to start HiView as external application from HiDiscovery and Industrial HiVision.

HiDiscovery File Edit Options ? ٠. 2 👱 🔳 🕼 🥹 Sec. 1 Preference 192.168.0.143,192.168.1.143,10.3.0.143: HighSpee... + Signal Properties WWW Telnet Ping Rescar Id MAC Address Writable Maddress A Net Mask Default Gateway Second and 2 00:80:63:C2: 1 EC:E5:55:24 х Ping 3 00:80:63:76: Cise default O Use this Insert \$IPAddress Telnet Use default O Use this Insert \$IPAddress Web Drows O Use default Use this c: programs/hirschmann/hiview2.0/ ----Ok Cancel

To use HiView instead of a web browser from HiDisovery you need to change the web browser path to <install-dir HiView>\AppletLauncher.exe -address

If you then highlight one device and click on WWW, HiView will start and open the selected device's webinterface
