

Which algorithms for authentication and privacy at HTTPS are supported by classic switches?

- 2018-02-09 - Classic Switches

The classic switches with release 9.0.0 support for HTTPS access following combinations:

| prio | ciphersuite | protocols |
|------|-------------|-----------|
|------|-------------|-----------|

| | | |
|---|------------|-------|
| 1 | AES128-SHA | TLSv1 |
|---|------------|-------|

| | | |
|---|---------|-------|
| 2 | RC4-SHA | TLSv1 |
|---|---------|-------|

| | | |
|---|---------|-------|
| 3 | RC4-MD5 | TLSv1 |
|---|---------|-------|

The most secure combination is used depending on the accessing browser.
